OBJECTIVE: Seeking a Data Scientist position

Currently a Data Science student at UNC Charlotte, developing skills in Python, R, Java, Excel, machine learning, and statistical analysis. A veteran of the U.S. Army with experience in automated logistics, inventory management, documentation accuracy, and workflow coordination. Known for strong problem-solving capabilities, meticulous attention to detail, and adeptness in analyzing structured data to improve processes. Holds a Cyber Security certification (2022) and is seeking entry-level roles such as Data Analyst, Junior Data Scientist, or Business Intelligence Analyst.

TECHNICAL SKILLS

- *Programming Languages: Python, R, Java*
- *Machine Learning Expertise: Regression models, classification techniques, supervised learning methods, model evaluation approaches*
- *Data Tools: Excel, Pandas, NumPy, Matplotlib, RStudio*
- *Analytics Skills: Data cleaning techniques; methodologies for descriptive statistics; data visualization strategies; exploratory data analysis practices*
- *Software Proficiency: Microsoft Office Suite; documentation system*
- *Additional Competencies: Strategies for process improvement; workflow analysis; recordkeeping; critical thinking*

EDUCATION

University of North Carolina at Charlotte

Bachelor of Science – Data Science (In Progress)

Relevant Coursework: Python programming; R language studies; Java applications; Excel usage; statistics fundamentals; machine learning principles; data analysis methods; model development techniques; data visualization strategies.

High School Diploma

CERTIFICATIONS

- *Cyber Security Certificate — 2022*
- *Global Combat Support System–Army (GCSS Army)*
- *Standard Army Maintenance System (SAMS)*
- *Equal Employment Opportunity Training*
- *Advanced Individual Training (AIT)*

EXPERIENCE

- U.S. Army — Automated Logistical Specialist

April 2015 – May 2018

- Managed inventory data accuracy across both automated and manual supply systems.
- Verified quantities against bills of lading and ensured alignment with contracts and purchase requests.
- Organized stock records alongside materiel control documents and supply reports.
- Detected discrepancies and utilized critical thinking to address logistical issues.
- Coordinated warehouse operations including receiving processes, storage solutions, and distribution tasks.
- Ensured compliance with document control protocols while effectively managing stock locator systems.
- Worked collaboratively with cross-functional teams to meet mission objectives while optimizing workflow efficiency.
- Provided training and leadership to team members which improved communication channels and operational coordination.
